

# GROUP PACKAGE WITH AREA ATTRACTIONS & RESTAURANTS

## SCIENCE ROCKS *Two Great Museums! One Great Price!*

Located on the North Coast Harbor in downtown Cleveland, the Rock & Roll Hall of Fame and the Great Lakes Science Center are two of Greater Cleveland's must see attractions. These neighboring museums offer a variety of experiences from just plain fun to weird, a little far out, amusing and well, even educational.

### Rock & Roll Hall of Fame - 10:00am–12:30pm

For an inside look at the lives and the stories behind the music of your favorite performers, bring your group to the Rock & Roll Hall of Fame. Our bold and original exhibits cover the history and evolution of rock and roll music from iconic rock stars to the artists on the charts today. We connect people, tell stories and do it with an attitude! The Rock Hall features dynamic interactive exhibits, intimate performance spaces and presents a rotation of artifact and costume displays. We are constantly changing exhibits to showcase specific eras, styles and milestones, as well as highlight the many facets of rock and roll.

### Lunch - 12:45pm – 2:00pm

Enjoy lunch at the Rock & Roll Hall of Fame Café or head over to the Great Lakes Science Center where guests can dine at Bytes, a cafeteria-style café. Box lunches available at both museums.

### Great Lakes Science Center - 2:15pm–5:30pm

After lunch visit the Great Lakes Science Center and have a hair-raising experience on the Bridge of Fire. Be a contestant on a live quiz show. Create a monster bubble! Enjoy live science demonstrations. Play virtual basketball or test your batting skills. The Great Lakes Science Center features more than 400 fascinating hands-on exhibits exploring the themes of science, environment, and technology. Daily programs, demonstrations and traveling exhibitions add to the excitement. Experience another world in the area's only DOME Theater.

Group Package Price (10 or more)	
Adults (19-64)	Youth (6-18) & Seniors 65+
\$34.96 <b>A</b>	\$31.90 seniors & \$27.84 youth <b>A</b>
